

REACH NEW HEIGHTS

About Us

Elevation's lifting solutions blend British engineering with ergonomic, Swedish design to deliver safer and more efficient working environments. Our headquarters is located in Peterborough, England in an impressive purpose-built, state-of-the-art facility.

For over 40 years, we've partnered with a hand-picked, international network of resellers to explore and address customers' material handling and manoeuvring challenges whatever the industry or application. Our high-quality, robust and reliable solutions range from standard or modified options right through to fully bespoke designs. They are all designed and manufactured by our in-house industry expert engineers.

We take a consultative, collaborative and flexible approach and embrace every customer challenge to ensure they invest in the right and best lifting and handling solution.

Have a browse through our brochure and contact your local Elevation Partner for more information.

Static Scissor Lift Tables

Elevation's Static Scissor Lift Tables combine high-quality British engineering with ergonomic Swedish design. With over 20 standard configurations available with different table dimensions and lifting heights, we'll be able to advise which model is right for your application. Our standard models range from 200kg to 3,000kg.

U-Shaped Low Profile Table

Why choose an Elevation Static Scissor Lift Table?

- ✓ High-quality and robust construction.
- ✓ Compliant with EN1570-1 and safe by design.
- ✓ Can be supplied with a service hatch for easy access to the power pack.
- ✓ Customised, modified and fully bespoke solutions available.
- ✓ High-intensity operation available.
- ✓ Can be installed in a pit.
- ✓ Can be supplied with lifting eye bolts for easy pit installation.
- ✓24V control voltage auxiliary supply to hand controller and safety trip bar including solenoid valve.
- ✓ Hand controller with constant pressure emergency stop on 3m curly cable for flexible operation.
- ✓ Low profile options available for use with GKN and Euro pallets.

Static Scissor Lift Table Specification

Here are our standard specifications for our Elevation Static Scissor Lift Tables. Remember – if these aren't quite right, we specialise in designing and manufacturing bespoke solutions specifically tailored to your application. Find out more about our bespoke solutions on page 14.

	Single Scissor Lift Tables - 500kg - 3,000kg						
Quick Code	Max Load (kg)	Platform L x W (mm)	Stroke (mm)	Closed Height (mm)	Approx. Lift Time (S)	Motor (kW)	Unladen Weight (kg)

Mobile Scissor Lift Tables

Elevation's Mobile Scissor Lift Tables are suitable for moving and lifting goods from 125kg up to 1,250kg as standard. Our range features light, medium and heavy duty models. The standard light duty model is available in steel or lightweight aluminium. In addition, we have an economical "no frills" collection supplied in five models ranging from 200kg to 800kg capacity.

Why choose an Elevation Mobile Scissor Lift Table?

- ✓ Ideal for transporting goods at the start and end of a production line.
- ✓ Can be used inside and outside.
- ✓ Manual and battery electric options available.
- ✓ Supplied with safety features including finger and toe guards, twin-braked castors and total stop brakes.
- ✓ Non-marking tyres.
- Stainless steel option available for use in the pharmaceutical and food manufacturing industries.
- Used in a wide range of industries including aerospace, retail, packing and shipping, engineering and automotive.
- ✓ Customised, modified and bespoke options available including (but not limited to) roller tops and roll-off guards.
- ✓ Single, double and triple scissor options available.

Mobile Scissor Lift Table Specification

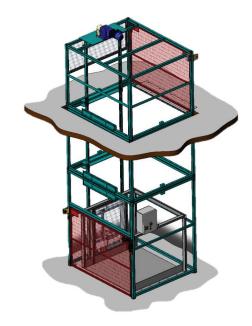

Here are our standard specifications for our Elevation Mobile Scissor Lift Tables. Remember – if these aren't quite right, we specialise in designing and manufacturing bespoke solutions specifically tailored to your application. Find out more about our bespoke solutions on page 14.

Light Duty Mezzanine & Goods Lifts

The Light Duty Mezzanine Lift and Goods Lift (MezzLite) is the goods only, no operator access lifting solution for maximising operation with minimal impact on space. The new modular design allows us to adjust the travel height to order, removes the need for a ramp and reduces installation time so your lift can be up and running in no time at all. The standard Light Duty model has a capacity of 250kg.

Why Choose an Elevation Light Duty Mezzanine Lift or Goods Lift?

- ✓ No structural work required to installation area due to its self-supporting, modular construction.
- ✓ Fully-enclosed lift shaft available to maximise health and safety.
- ✓ Compact design for minimal impact on factory footprint.
- ✓ Chamfered leading edge ✓ Outwards opening for loading and unloading removing the need for a pit or ramp.
- ✓ Electromechanical interlock system to prevent the lift doors from opening if the lift is not in the parked position. ✓ Quiet during operation.
- ✓ Push to run controls and emergency stop buttons.
- gates to maximise usable space inside the lift.
- ✓ Choice of single or three phase power supply.
- ✓ Optional extras include PLCs. increased capacity, larger platform, adapted gates and clad enclosure.
- ✓ This is a goods only hydraulic lift to BS EN1570-1. Operator access is prohibited at upper level.

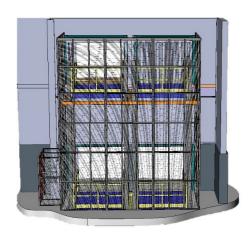

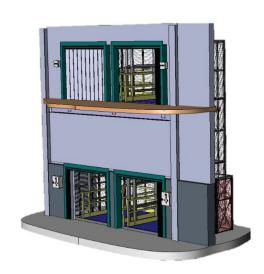

Heavy Duty Mezzanine & Goods Lifts

Our Heavy Duty Mezzanine Lifts and Goods Lifts are suitable for lifting goods over 250kg to approximately 10,000kg to a mezzanine floor or between levels. Although we offer a few standard models, our Heavy Duty Lifts are extremely adaptable and versatile to ensure they are suitable for your application and environment.

Why Choose an Elevation Heavy Duty Mezzanine Lift or Goods Lift?

- ✓ Construction of self-supporting or supported mast.
- ✓ Fully-enclosed lift shaft.
- ✓ Limit switch system at upper level to ensure the platform parks accurately.
- ✓ Platform is either supplied ✓ Fail-safe with a loading ramp or is pit-mounted to ensure level loading.
- ✓ Outward opening gate for ease of loading and unloading and maximising usable space internally.
- electromechanical interlocks to prevent lift from opening when it's not parked.
- ✓ PLC (Programmable Logic ✓ Power requirement Controller) system offers operation with emergency stop button on each level.
- ✓ The power pack is mounted safely within the lift enclosure.
 - for the lift is 415V 3-phase + neutral via 16amp isolator (not included).

Our Elevation Partners

At Elevation, we pride ourselves on only working with the very best distributors from around the world. We work collaboratively with our Elevation Partners to ensure we're embracing customers' challenges, providing a first-class service and delivering the right and best lifting, handling and manoeuvring solution for the individual application even if that means designing and manufacturing something bespoke.

We like to take a consultative working approach with our resellers and refer to them as Elevation 'Partners' rather than distributors as we consider them a vital part of the Elevation team.

This collaborative relationship enables us to embrace customer challenges and go the extra mile to improve their working environment with our lifting aids.

To find your local Elevation partner, visit our website www.elevation-mh.com.

Become an Elevation Partner

If you think you can share the same commitment and passion for improving the health, safety and efficiency in the customer's workplace, please contact us to introduce yourselves. We can then provide more information about how you can become the local Elevation Partner in your area and join our network of international resellers.

Bespoke Solutions

We specialise in designing and manufacturing bespoke lifting solutions for a wide range of industries and applications for customers all around the world. Elevation's aim is to help increase productivity and improve health and safety in the workplace. Here's how we do it.

Every day, our Elevation Partners contact us with their customers' lifting and handling challenges. Our Elevation Partners are hand-picked to ensure we're only working with experts who are equally as passionate about delivering lifting and handling solutions to help companies reach new heights.

Our dedicated Account Managers are based at Elevation headquarters in Peterborough, United Kingdom where our solutions are both designed and manufactured. They work closely with the Elevation Partners throughout the process and oversee projects from start to finish. This approach provides us with the flexibility to take on any lifting and handling challenge, whatever the industry or application.

The Elevation Technical Design team use their industry experience, technical knowledge and the latest in design software to bring solutions to life for a customer to see and check before sign-off.

Once the drawings have been signed-off and the project planned, it's on to manufacturing!

In 2017, we moved to our new site after outgrowing our previous premises. Here we have our offices and state-of-the-art, 50,000sqm factory. This new facility provides the space for us to work on larger standard and bespoke projects such as car lifts and goods lifts.

Prior to any finished product leaving our factory, we carry out rigorous quality checks and tests to ensure it is of the highest of standards and ticks all the customer's boxes before we pass it over to our Elevation Partner ready for the customer.
